Gray, beige, yellow, red or black?
Smooth surface or studded profile?**

We have the right tile for every requirement.

Porcelain stoneware tiles made in Germany.

Safe, highly durable, long-lasting

With over 150 years of experience, we offer tiles for highly durable industrial floors worldwide. Our porcelain stoneware tiles stand for safety, quality and durability. They are resistant to acids and alkalis, hygienic and can withstand the highest loads for decades. Pure natural raw materials, unparalleled precision in manufacturing and the strictest quality controls form the foundation of our products. They proudly bear the „Made in Germany“ seal. Our quick availability, generous storage spaces and just-in-time logistics ensure smooth worldwide delivery. Our experts provide individual and personal advice tailored to your specific requirements.

Are you planning a project and need support with the selection and ordering of tiles?

Industrial flooring for all requirements.

Robust, timeless, high quality

Whether in the food industry, car workshops, laboratories, the chemical industry or ambulance service stations, high-performance flooring is required in all these areas. The specific requirements for slip resistance, hygiene and load can vary greatly. Argelith specializes in these areas and provides the right foundation for your industrial flooring with durable tiles.

Areas of Application

For the highest loads in industry, trade and commerce.

Bakeries

Breweries

Retail

Food and beverage industry

Dairies

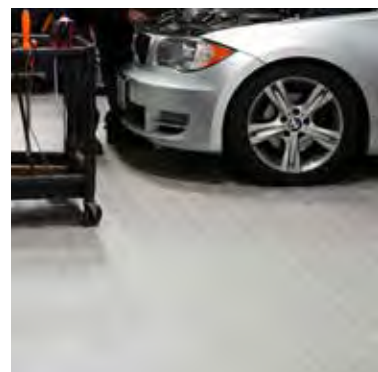

Wineries

Truck service shops

Fire stations

Car service shops

Porcelain stoneware tiles. Robust all-rounders.

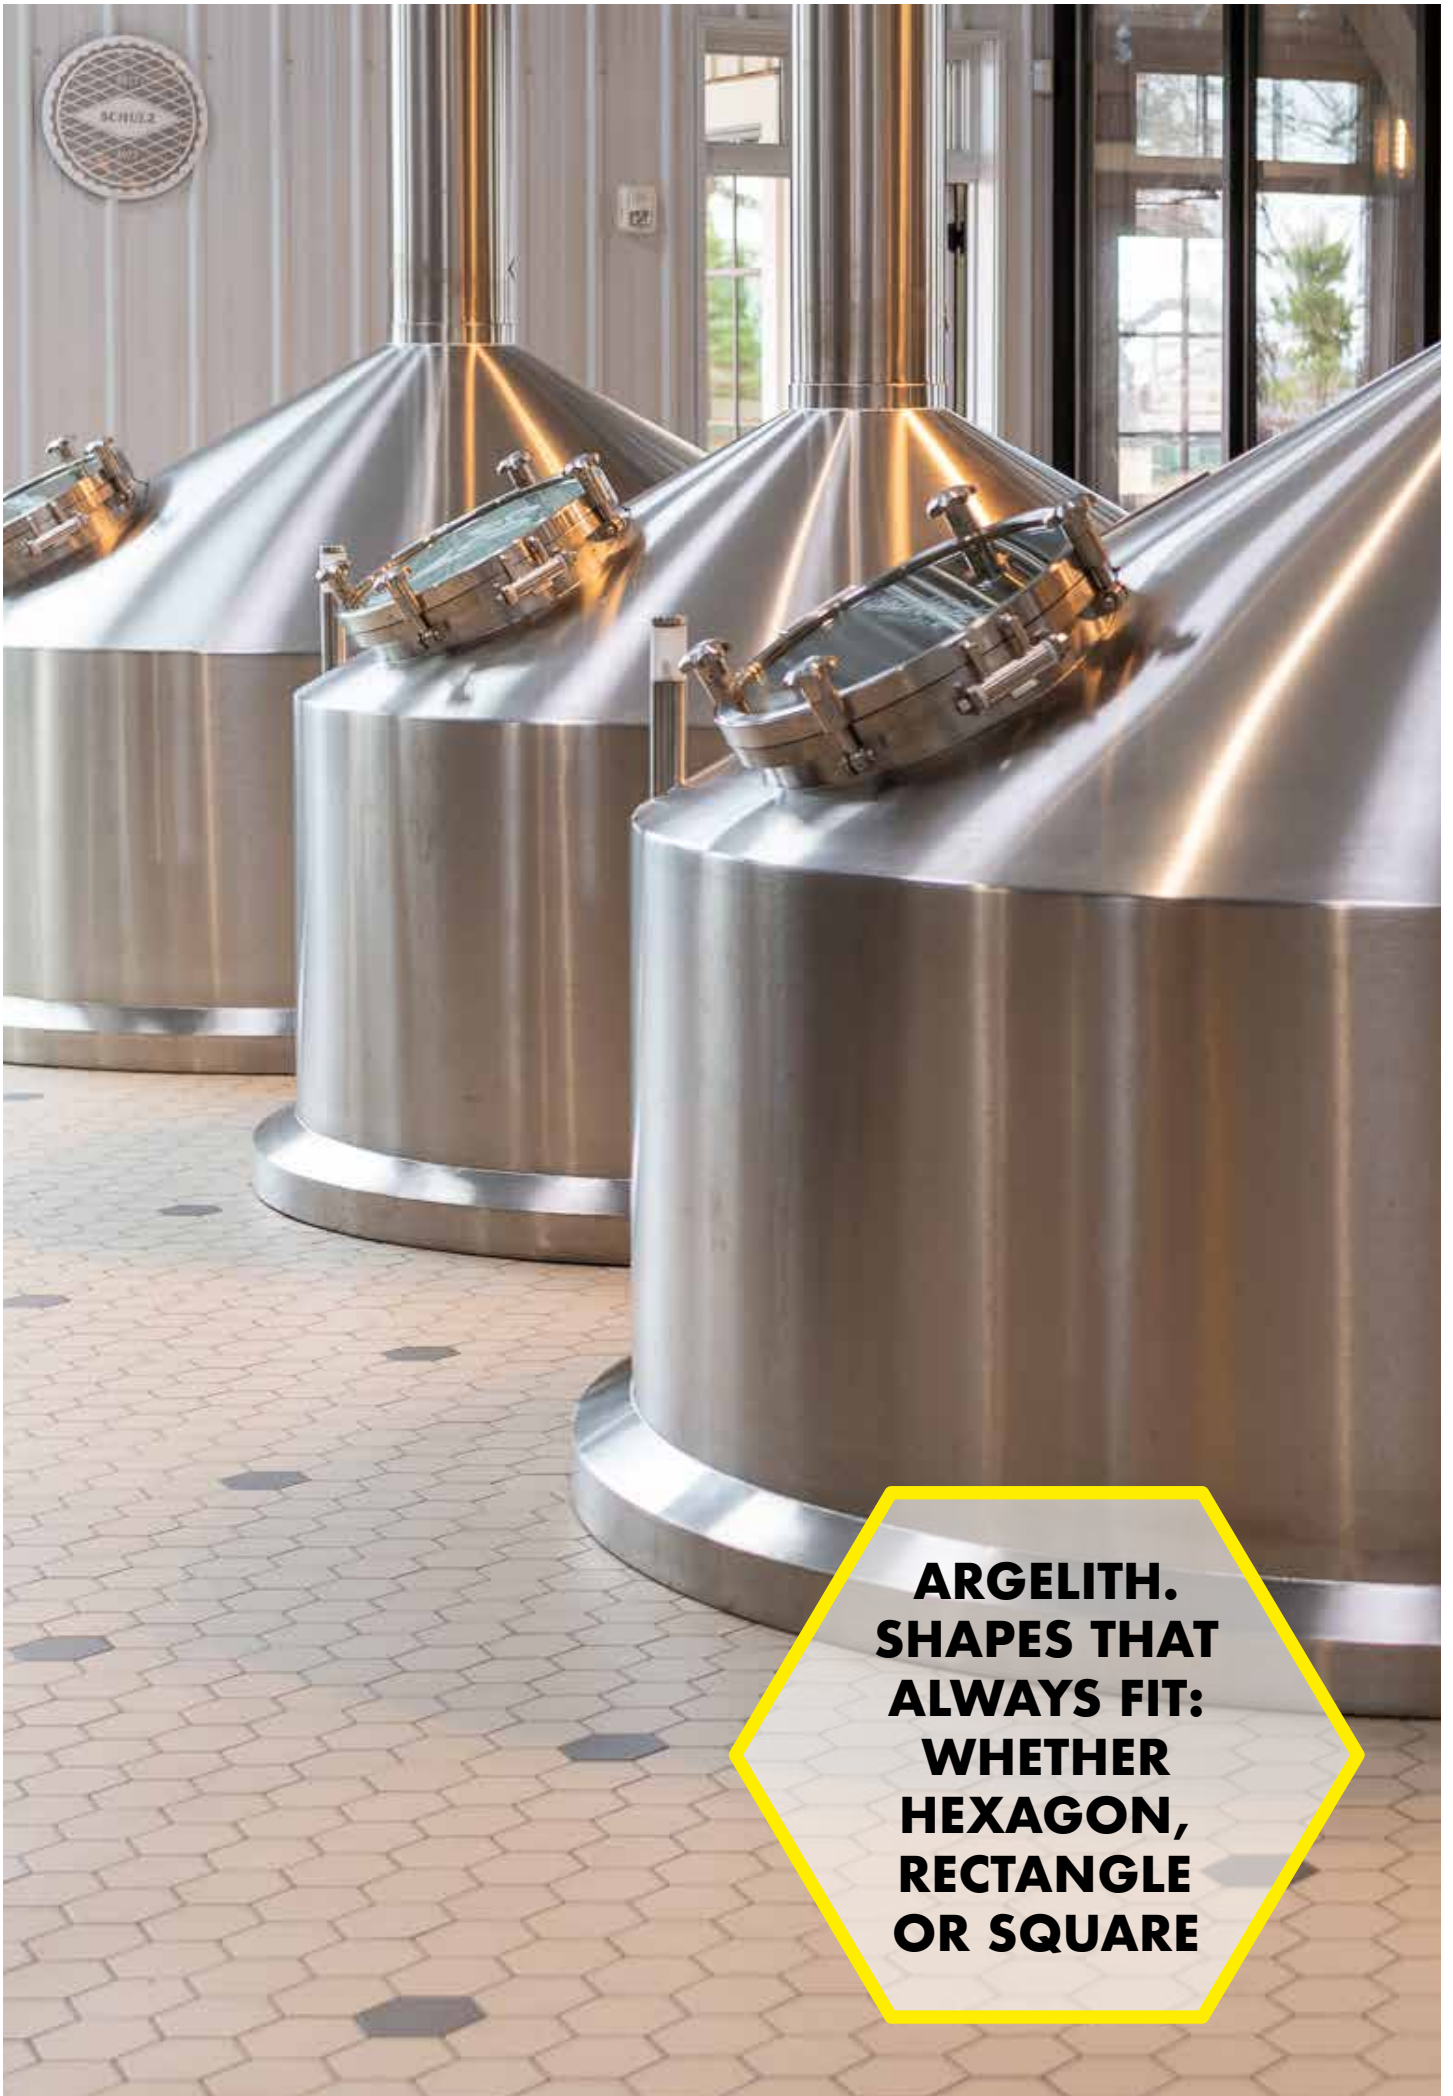

Hygienic, durable, perfectly usable

Argelith porcelain stoneware tiles are characterized by high safety. They minimize the risk of slipping – especially with the appropriate surface structure—and are resistant to mechanical abrasion, dirt and chemicals. Systematic quality tests ensure that Argelith tiles meet the strict requirements of DIN EN 14411. This creates industrial tiles that are attractive, durable and perfectly usable in all areas. Ceramic tiles have many advantages:

- **Robust and durable**
- **Long-lasting and sustainable**
- **Resistant to acids and alkalis**
- **Hygienic HACCP & EHEDG membership**
- **Water absorption < 0.2%**
- **Break and abrasion-resistant**
- **Resistant to temperature changes and fireproof**
- **Frost-resistant**
- **Stain-resistant**
- **Easy to maintain and slip-resistant**
- **Resistant to oils, liquids and chemicals**
- **High dimensional accuracy < 0.5 mm**
- **Creation of slopes is easily possible**
- **Easy repairs possible**
- **Free from pollutants, free from chemical emissions**
- **100% recyclable**
- **Odor-neutral**

Strengths and Formats

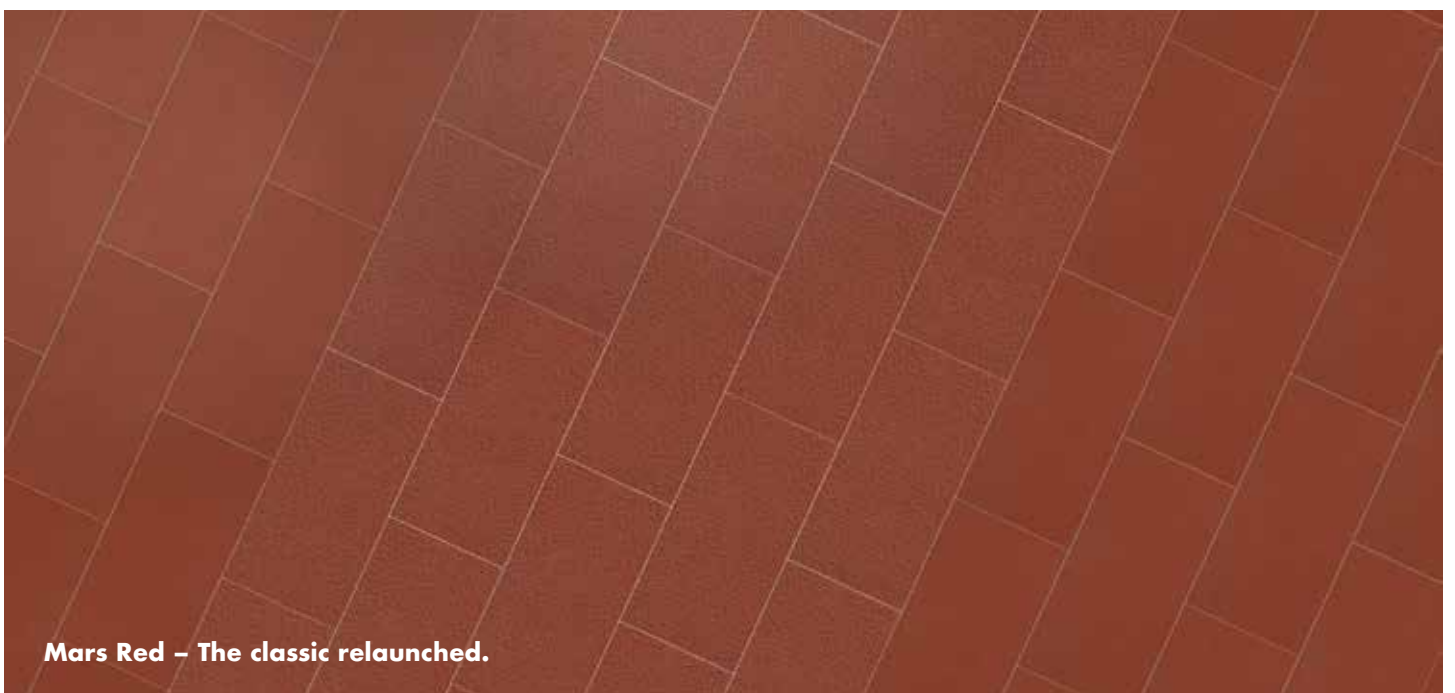

Hexalith® – The standard in food production.

Kerasig® – Permanent hazard marking.

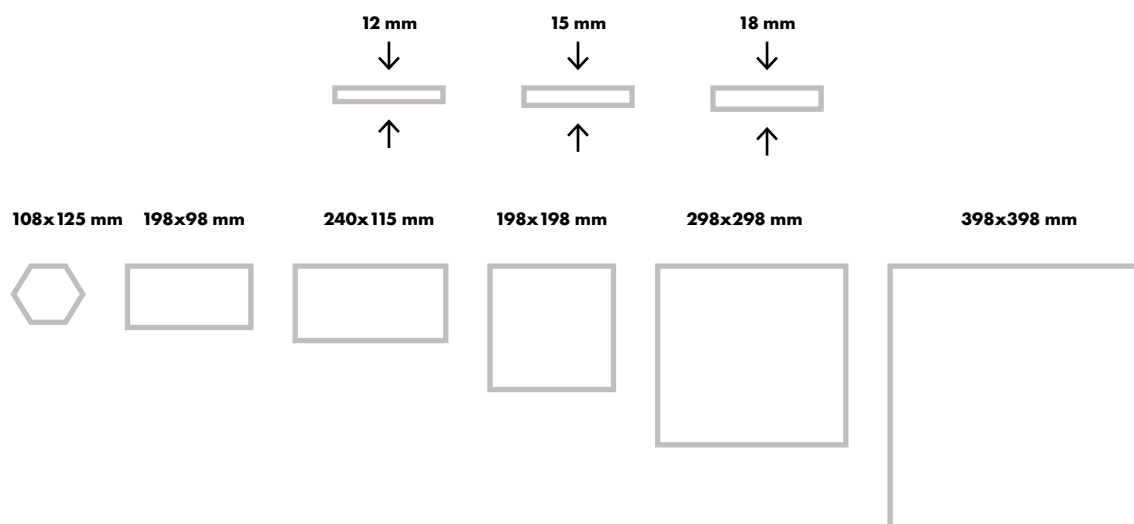

Mars Red – The classic relaunched.

Quality that you can see and feel.

High quality, versatile, indestructible

A wide range of shapes, colors, surface structures and tile thicknesses makes Argelith porcelain stoneware the perfect flooring—from workshop tiles to exhibition tiles to hexagonal tiles Hexalith®. With Kerasig®, we have developed a tile that clearly and permanently marks hazardous areas. The color „Mars Red“ combines the classic clinker color with the high technical advantages of modern porcelain stoneware tiles.

Strong colors for strong floors.

Your choice: 6 standard and numerous special colors

Possible color deviations are due to printing technology. More colors and surfaces are available upon request.

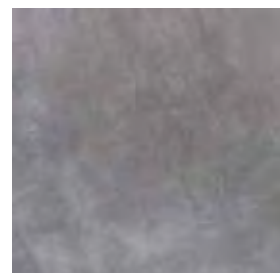

Your choice: smooth surface or studded profile

Do you want a different color or your own print?

Discover our extensive range of special colors on our website. Upon request, anything is possible from a certain order quantity. Our in-house raw material processing and the latest digital printing technology make every conceivable color and individual design possible: www.argelith.com

High-quality processing, safe installation.

Robust, durable, slip-resistant

Argelith tiles are the first choice when it comes to high-performance industrial floors. In combination with professional installation, our products become your high-quality industrial floor. We work with a wide network of tile installation companies specializing in industrial applications and create first-class floors with our tiles. Argelith tiles are installed using common installation methods depending on the requirement. These include thin-bed, thick-bed and medium-bed installation as well as the vibration installation method developed specifically for industrial floors. Together with our installation partners, we support you not only in the selection of products but also in the technical implementation.

We are happy to recommend an experienced installer from our worldwide partner network.

Thinking about tomorrow today – exclusively mineral raw materials.

Innovative, sustainable, thoughtfully designed

Innovative and sustainable product developments are top priorities for Argelith. Because what fits and lasts perfectly does not need to be renewed—and thus conserves resources. From raw material preparation to sorting, we manufacture porcelain stoneware tiles completely in-house. We use only raw materials with the highest quality standards that are carefully tested and processed. Experienced and qualified employees control the entire production process at the highest technical level. Regular quality controls, which take place both before and during the firing process, guarantee a flawless end product. Our porcelain stoneware tiles consist exclusively of natural raw materials and are environmentally friendly par excellence thanks to their almost unlimited lifespan and recyclability.

**FOR THE ENVIRONMENT:

DURABILITY,
RECYCLABILITY**

Family-run tradition for generations.

Reliable since 1870

In the field of industrial tiles, Argelith has been recognized as a specialist for decades. Ceramic products have been manufactured at the Bad Essen location in the Osnabrück region since 1870. The construction of the Hoffmann kiln laid the foundation for the successful ceramic production from the beginning. Over the decades, the production site has been continuously optimized and expanded.

To this day, Argelith's innovative strength remains unbroken. Argelith always has contemporary requirements in mind: in the 19th century as well as today in the 21st century. This tradition of innovation and adaptability enables us to always offer the best solutions for modern industrial requirements.

Eva Bitter took over the management from her father Heinrich Bitter in 2022.
